CASH PAYMENT SOLUTION

IN THIS DAY AND AGE, THE CARRYING OF CASH ON ONE'S PERSON IS A HUGE RISK IN ITSELF; NOT TO MENTION THE COLLECTION AND TRANSPORTATION OF THAT CASH. IN ORDER TO MINIMISE THE RISKS, LOGISTICS AND SECURITY ISSUES RELATED TO CASH PAYMENTS, CLIENTS LIKE YOURSELF NEED TO ADOPT SEAMLESS SYSTEMS THAT OFFER YOU MAXIMUM PEACE OF MIND … SOLUTIONS LIKE THOSE OFFERED BY FACE TECHNOLOGIES.

PENNY WISE? NOT FOOLISH AT ALL!

Face Technologies, or Face, as the company is commonly referred to, is an IT systems integrator specialising in card technology and biometrics. Founded in 1993, we at Face have in excess of 15 years' experience in this specialised field.

We have used our extensive knowledge of, and experience in, the field of secure cash payments to design, develop and supply an integrated mobile cash payment system that can be used for secure payment of social grants, pensions, etc. in cash.

The combination of the highly secure features of smart cards and biometrics provides for authentication of the **recipients** of the cash payment, as well as two-factor authentication of **approved users** of the system. This ensures that only authorised personnel can operate the system and that payment is made to the correct persons.

In this smart card-based system the use of counterfeit cards is eliminated by means of the card authentication process. A cryptographic-based authentication process between the system and the presented card guarantees the authenticity of the card. This process uses cryptographic keys contained in both the system and the card.

Ours, therefore, is a comprehensive one-stop solution for secure cash payments in the mobile environment. Any company, institution or government that has the task of making regular cash payments to a selected group of authorised people will benefit from implementing this solution. It includes:

+ **Enrolment software and hardware** to capture data and images such as photographs, fingerprint images and electronic signatures.
+ A secure, robust back-end solution for **recording and processing payment data**, as well as financial reconciliation.
+ A full **audit** trail of all transactions is also maintained.
+ A **database** for payees' demographic information and images.
+ **Front-end software for verification** of the payee/grant recipient and to facilitate payment on successful verification.
+ An optional **automated cash dispenser**.

In closing, we at Face Technologies welcome your enquiry. We have an established track record, we use state-of-the-art technology and proven project management techniques to deliver fully integrated, customised turnkey solutions on a client-for-client basis. Face it … you simply can't go wrong with Face!
