

DRIVING LICENCE AND MOTOR VEHICLE REGISTRATION SOLUTIONS

DRIVEN TO SUCCEED

FACE TECHNOLOGIES

IDENTIFYING NEEDS ... SURPASSING EXPECTATIONS

INCREASED SECURITY AND MANAGEMENT OF DRIVING LICENCES AS WELL AS THE REGISTRATION OF MOTOR VEHICLES ON OUR ROADS, GO HAND IN HAND WITH AN INCREASE IN TRAFFIC VOLUMES, RESULTING IN A GROWING NEED FOR TECHNOLOGICALLY-ADVANCED SOLUTIONS. THESE SOLUTIONS WOULD INCLUDE INTERNAL AND CROSS-BORDER VEHICLE REGISTRATION, THE PROCESSING OF DRIVING LICENCE APPLICATIONS, AS WELL AS THE PRODUCTION AND ISSUING OF SECURE DRIVING LICENCE CARDS.

Face Technologies, or Face, as the company is commonly referred to, is an IT systems integrator specialising in card technology and biometrics. Founded in 1993, we at Face have in excess of 15 years' experience in this specialised field.

We use our extensive experience to design, develop and implement customised, driving licence and motor vehicle registration solutions internationally. Our track record proves that seamless integration of systems such as these is the secret to our success. We realise that every country's requirements are unique, and this necessitates an in-depth understanding of your country's particular licensing

requirements. We also fully appreciate the importance of data integrity and security when gathering national driver and motor vehicle registration information. This is why we follow a partnership approach for each project, from the first step of identifying your requirements and defining the system specifications through to implementation. The customised Face solution conforms to the specific country's legislation. The Face solution incorporates the following components:

- + **Driving licence applications:** Via an on-line, real-time computerised process.
- + **Driving licence card production:** Card products range from laminated Teslin cards to PVC and other state-of-the-art materials, including smart cards.
- + **Motor vehicle registration and licensing:** Face has developed a system that facilitates the automation of manual vehicle registration and licensing, using unique document numbers and encrypted bar codes.
- + **Cross-border vehicle registration:** This involves temporary vehicle registration at the various ports of entry to a country. Statistical information is made available to law enforcement teams and decision-makers on how to optimise road safety and manage foreign vehicles.

In closing, Face Technologies welcomes your enquiry. We have an established track record, we use state-of-the-art technology and proven project management techniques to deliver fully integrated, customised turnkey solutions on a client-for-client basis. Face it ... you can't go wrong with Face!
